

The compact one... **HUBTEX.**

- Load capacities up to 5,0 t
- High load centres
- Working aisle widths equal to standard reach trucks
- Heavy duty versions
- Special design versions

Electric reach truck

...manoeuvrable and compact

HUBTEX reach trucks are characterized by a combination of compact design and high load capacities. They are used wherever the load capacities of standard reach trucks of series manufacturers reach their limits.

HUBTEX SQ offers considerably higher load capacities at the same dimensions as conventional reach trucks. Thus, SQ can be used in the same working aisle widths. Energy-efficient control systems of the latest generation allow long battery service times and a maximum handling capacity.

» Fast handling of goods
due to powerful drive technology
and high-performance hydraulic system

» Load capacities from 3.0 to 5.0 t
even at large load centres are involved

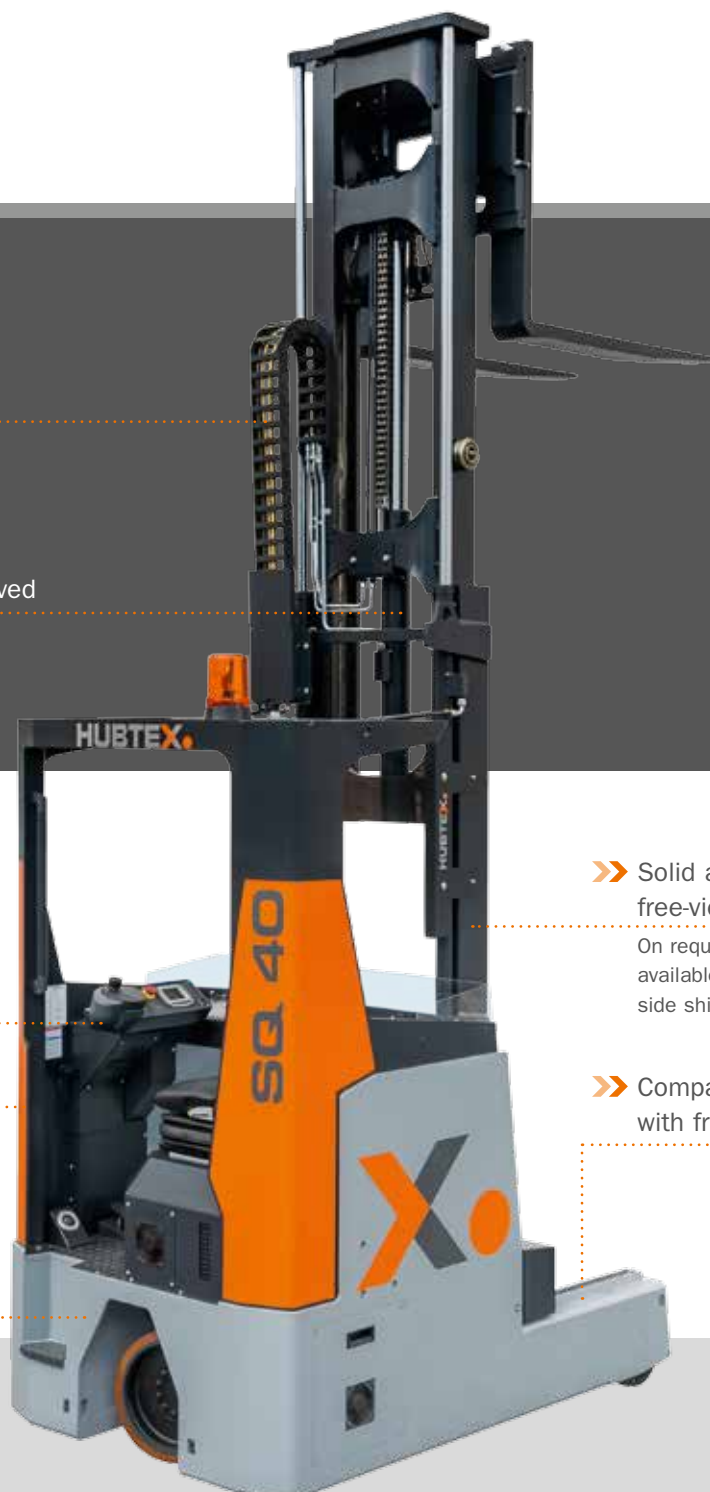

» Prolonged period of application
with the same battery capacity
due to modern control technology
with energy recuperation

» Optional: Quick battery exchange
is possible via roller table

» Maintenance free
electronic brake system

» Solid and robust
free-view lift masts
On request, accessories are
available, such as crane arm,
side shifter, etc.

» Compact truck dimensions
with frame widths from 1300 mm

Well-arranged operational controls
and easiest operation by means of
HUBTEX fingertip switches

Easy battery exchange via roller table

without HUBTEX – 2500 kg

with HUBTEX – up to 5000 kg

Your solution when things get tight!

The improvement of logistic processes often results in the need of handling heavier loads with larger dimensions. The size of the working aisles often remains the same. In such cases, conventional reach trucks reach their limits. HUBTEX SQ combines high load capacities and large load centres with compact vehicle dimensions, and therefore offers a solution for equal working aisles.

» SQ series in comparison

	HUBTEX SQ 50	Standard reach trucks
Load capacity (t)	3.0	2.5
Load centre (mm)	1200	600
Lift height (mm)	2500	2500
Overall width (mm)	1300	1350
Overall length (mm)	2870	2550

...the compact solution!

» Heavy duty version

Apart from the compact series, HUBTEX offers its customers a heavy duty version of reach trucks. These vehicles have been especially developed for applications where large weights are combined with compact load dimensions, for example in the field of metal, coil and roller handling.

» Special design

Due to the special engineering know-how and individual manufacturing possibilities, HUBTEX can meet the individual requirements of its customers in various ways.

A solution which is exactly designed for your case of application, for example the combination of reach truck and multidirectional steering with small turning radius, or the integration of special attachments, offers maximum benefit, high vehicle availability and longevity.
